

## BETA 1000 SILICONSTOP ANTISILICONE CLEANER

BETA 1000 is ideal for the cleaning of the surfaces to varnish.

Particularly suitable to avoid fish eyes on contaminated substrates . A rapid evaporation and its big degreasing power are characteristics of this very special cleaner.

BETA 1000 will avoid all the problems caused by the presence of silicone during the varnishing.

Use a duster saturated with BETA 1000 to clean the surface to varnish.

Hermetically seal tin after use.

Protect from humidity.

PACKING:

12 CANS OF 1L

4 CANS OF 5L
